**We write Clojure at The Climate Corporation,  
and we're hiring! Come work with us!**

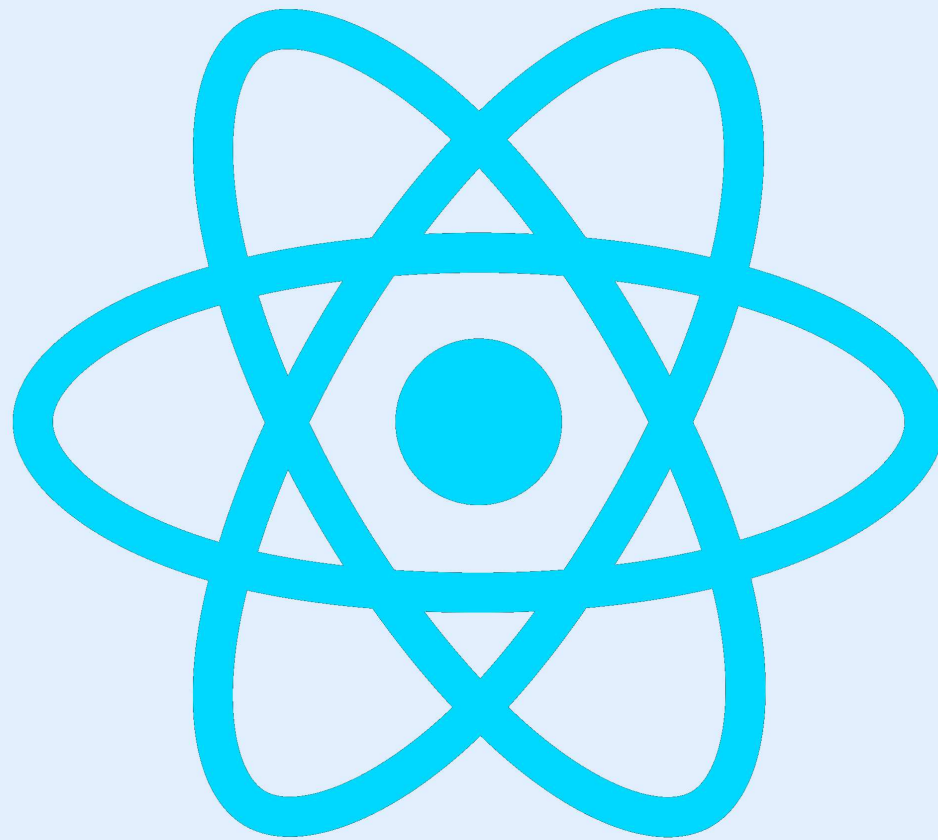

## Why ClojureScript? Isn't JavaScript good enough?

ClojureScript lets us use Clojure, a real lisp, in place of JavaScript.

Reagent is a wrapper around React.js for  
ClojureScript.

## Why do we want to use React.js?

- React.js comes out of Facebook originally, but is used everywhere now.
- React.js dates back to 2011.
- React.js is good at creating user interfaces.
- If you are used to MVC, React.js is the V.

**Conclusion**
